Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 2, drawn to a process of making plastic floor tiles, classified in class 264, subclass 294.
- II. Claims 3 and 4, drawn to an apparatus for making plastic floor tiles, classified in class 425, subclass 335.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another and materially different apparatus such as an apparatus including a controller for adjusting the temperature. The apparatus as claimed can be used to practice another and materially different process such as a process of shaping (by compression) products other than PVC (e.g., polyester, polyamide).
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
